

Stay Active!

fitness resources

Being active is being healthy. Our doctors consider exercise a "vital sign" for all patients.

Kaiser Permanente • Fremont • Hayward • San Leandro • Union City

Taking the first step

Regular physical activity - at least 150 minutes each week - can help you feel better, maintain a healthy weight, and reduce your risk of heart disease, stroke, diabetes, osteoporosis, and certain cancers. Exercising is an important part of your overall health, and makes a big difference in how you feel every day. Find something you enjoy. Set a small goal to start. Work up to 150 minutes a week. Have fun!

Walking

Walking is one of the best forms of exercise. Consider joining an organized walk, walking group, or a partner to support you in your walking goal.
