

Kaiser Permanente's Santa Monica Medical Offices Win Prestigious Award

Kaiser Permanente West Los Angeles won a silver award for “Best Medical Project” for its Santa Monica Medical offices from the Los Angeles Business Journal’s 2017 Commercial Real Estate Awards in February, 2017.

“We are honored to receive this recognition for our Santa Monica medical offices, which were designed to provide a modern and welcoming space for our members to receive world-class care and service,” says Georgina Garcia, senior vice president, area manager, at Kaiser Permanente West Los Angeles Medical Center.

A few of the innovative features at the Santa Monica medical offices include telemedicine, cutting-edge health information technology, and interactive patient rooms. The medical offices opened last May and serve about 10,000 Kaiser Permanente members who work and live in Santa Monica.

Kaiser Permanente shares this recognition with Oltmans Construction, the construction firm with whom we partnered to make our Santa Monica Medical Offices a highly flexible, functional and well-constructed space.
