

Attendant Assisted Parking

Monday-Friday | 7 a.m. to 5 p.m.

Complimentary Attendant Assisted Parking

We are introducing a new program for our members and visitors called **Attendant Assisted Parking** to help you find available parking spaces on the **Fremont Medical Center** campus.

Here is how **Attendant Assisted Parking** works:

- If you are unable to find a parking space, please drive up to the parking attendant stand in front of the Niles East Building (south side/ Stevenson Blvd. side) for assistance to find an available parking space.
- A parking attendant will radio a roaming parking assistant staff member who will search for an available space.
- If an open parking space is located, the parking attendant will guide you to the available space to self-park.
- If no parking spaces are available, you can leave your car keys with the attendant who will find you a parking space when it becomes available and park your car.
- After you return, a parking attendant will assist you to find your car in one of the numbered parking spaces. If further assistance is needed, it will be provided by the attendant.

Thank you as we continue to enhance your experience at the Fremont Medical Center.
