Walk in today to get your Mammogram or call 818-719-2700 to schedule one.

As one of America's leading health care providers, we know that regular mammograms can detect cancer early and lead to better outcomes.

**YOUR BEST PROTECTION IS EARLY DETECTION.**

- **Early is Better:** The breast cancer survival rate is 98% if detected early, compared to only 27% if breast cancer is found in advanced stages.

- **Family History:** About 80% of women diagnosed with breast cancer do not have a family history of it.

- **Size Matters:** A lump is usually the size of a pea before it's felt through self-examination. Mammogram can find lumps the size of a grain of rice.

Per clinical guidelines, women 52 to 74 years old need to have a mammogram screening EVERY 2 years.

Walk in to the Breast Center, Entrance B, 3rd Floor, Suite 349 today to get your mammogram or schedule one by calling 818-719-2700.
