Kaiser Permanente Southern California shall maintain a healthy and safe environment for its members, patients, employees, and physicians which may include adjusting or restricting visitors at certain times due to the prevalence of disease in the community.

In order to protect medically at-risk patient populations and hospital staff from contracting COVID-19, the following visitation restrictions will be implemented:

1. Visitors who exhibit flu-like illness (fever greater than 100 degrees F in addition to a cough or sore throat) may not visit hospitalized patients during COVID-19 outbreak.

2. Visitors are limited to two (2) at a time.

3. Children 14 years old and younger may not visit.

4. Pediatric patient care unit visitation is limited to parents, guardian or primary caretaker only.

5. Special Care Nursery visitation is limited to parents, guardian or primary caretaker only.

6. Exceptions to the policy may be made for those visiting patients receiving end-of-life care.

7. The hospital will at a minimum conduct passive screening of visitors including posting of signage and playing audio/video messages to inform visitors about the visitation restrictions. Active visitor screening may be implemented for specific patient units in consultation with and approval of hospital administration.
